

Title: Retrieval Augmented Generation for Enterprise Search

Abstract: Retrieval augmented generation combines external knowledge retrieval with large language models to generate more accurate and relevant responses.

Introduction: Traditional knowledge engines rely exclusively on parametric memory.

Section 2: Hybrid Retrieval with Dense and Sparse Signals

What does the survey say about hybrid retrieval? The survey states that hybrid retrieval fuses dense ve

Section 3: Empirical Benchmarks and Locators

Locators ensure precise attribution: every claim links back to page numbers in papers, timestamps in v
